

MANAGER / DIRECTOR TRANSMISSION ENGINEERING

Chesterfield, Missouri or San Francisco, California

About Longview

Longview Infrastructure is a developer of energy infrastructure backed by Stonepeak, a leading alternative investment manager with over \$83 billion in assets under management. Longview develops, constructs, owns, operates and maintains electric energy infrastructure. It combines proven execution capabilities and sophisticated investment solutions to provide benefits to ratepayers and enable economic growth.

About the Role

Longview is seeking a highly-motivated and experienced engineer professional to lead the design and engineering of transmission projects alongside a fast-growing, highly-skilled team. As **Manager/Director Transmission Engineering**, you will be responsible for the technical design of extra-high voltage transmission projects. You will:

- Optimize the selection of structures, conductors, spotting, and foundations
- Review and approve consultant and contractor design packages including design criteria, structure families, substation general arrangements, equipment selection and material/construction specifications
- Develop and maintain Longview's engineering standards
- Innovate and optimize cutting edge designs and technologies

Who You Are

- 10+ years' experience with design responsibility for high voltage transmission facilities
- Demonstrated track record of leadership and critical thought
- Bachelor's or Master's in engineering
- Results-oriented team player with an ownership mindset

What We Offer

- Competitive salary, bonus, and equity participation
- Excellent health, dental, vision, insurance, 401(k), and Paid Time Off
- Partnership with a small, highly effective team drawn from the best in the industry
- Outsized immediate responsibility and rapid career development
